

FLAMEBREAK

FSC Certified
FLAMEBREAK™

Rev.D

Notwithstanding any other considerations, Pacific Rim Wood Ltd. and P.T. Kutai Timber Indonesia have a vested interest in ensuring the sustainability of the raw materials used for the manufacture of FLAMEBREAK™ door cores and are strong supporters of the FSC (Forest Stewardship Council).

P.T. Kutai Falcatta plantation

The primary species used for the manufacture of FLAMEBREAK™ is Falcatta which is a fast growing light weight plantation hardwood grown in forests that are either owned or managed by P.T. Kutai Timber Indonesia. Other species used in the manufacture of FLAMEBREAK™ (and other P.T. Kutai timber products) include plantation grown Radiata pine from New Zealand, Meranti from Indonesia and plantation grown Kamarere from Papua.

FSC Meranti

FLAMEBREAK™ cores are available with full FSC certification and with chain of custody records from plantation through to the factory finished product.

Raw materials used in the manufacture of FSC Certified FLAMEBREAK™ are obtained from FSC accredited sources audited by:

- BM TRADA
- Soil Association Certification Ltd.
- The Rainforest Alliance
- SmartWood

P.T. Kutai plantations and the manufacturing plant meet the requirements of FSC-STD-40-004 (Version 2.0) EN and FSC-STD-40-005 (Version 2.1) EN for Chain of Custody Certification with audits carried out by BM TRADA.

P.T. Kutai Timber Indonesia meets the Environmental Management System requirements of ISO 14001 : 2004 and is registered within the BM TRADA certification scheme to this effect.

In addition the P.T. Kutai factories operate ISO 9001 : 2008 quality control systems audited by BM TRADA providing for confidence with regard to the consistency of the FLAMEBREAK™ product and full traceability, where required from sapling through to the FLAMEBREAK™ door core.

Registration Certificate

BM TRADA certify that the FSC Chain of Custody System of

PT Kutai Timber Indonesia

Jl. Tanjung Tembaga Baru,
Pelabuhan Probolinggo 67201
East Java – Indonesia

meets the requirements of FSC-STD-40-004 (Version 2.0) EN and FSC-STD-40-005 (Version 2.1) EN for Chain of Custody Certification and is registered within the BM TRADA certification scheme

The client agrees to maintain their chain of custody system to continually meet the requirements and use the logo and accreditation mark in accordance with BM TRADA and FSC regulations

Scope of Certification

Manufacture and sales of Plywood, Door Blank and Block Boards made from FSC Certified Timber.

Product Groups / Categories Covered by this Certification

Product Groups
Joinery products

Material Category
FSC Pure &
FSC Mixed

Control System
Transfer System,;Percentage
System,;Credit System

Forest Stewardship Council
United Kingdom

WHAT IS THE FOREST STEWARDSHIP COUNCIL?

Forests support up to 1.6 billion of the poorest people in the world. Sixty million indigenous people and countless species of plants and animals are wholly dependent on forests for their lives.

Demand for forest products, such as timber and paper, continues to grow, putting increasing pressure on the world's forests.

Wood is a renewable resource; when forests are well-managed, with consideration for the environment, the wildlife and the people who live and work in them, harvesting timber can actually be an effective way of safeguarding the forests for future generations.

Choosing products sourced from these well-managed forests and from recycled post-consumer waste allows businesses and consumers to support the world's forests.

How can you be sure that you are not supporting deforestation?

Look out for the Forest Stewardship Council (FSC) logo on paper, timber and other forest products.

FSC enables you to buy forest products of all kinds with confidence that you are not contributing to global forest destruction.

What is the Forest Stewardship Council?

The Forest Stewardship Council (FSC) is an international, non-governmental organisation dedicated to promoting responsible management of the world's forests. It was founded in 1993 in response to public concern about deforestation and demand for a trustworthy wood-labelling scheme. FSC has developed a system of forest certification and product labelling that allows consumers to identify wood and wood-based products from well-managed forests.

How can you be sure that the product really does come from an FSC certified forest?

In addition to forest certification, the FSC system includes a certified chain of custody that tracks the timber through every stage in the supply chain from the forest to the final user. This is monitored through the invoicing process and the final label on the product has a code that confirms that the item is genuinely FSC. Codes can be verified by contacting FSC UK.

What does the FSC logo mean?

The Forest Stewardship Council (FSC) logo on a wood or wood based product is your assurance that it is made with, or contains, wood that comes from FSC certified forests or from post-consumer waste.

What makes FSC forests special ?

FSC certified forests must be managed to the highest environmental, social and economic standards. Trees that are harvested are replanted or allowed to regenerate naturally, but it does not stop there. The forests must also be managed with due respect for the environment, the wildlife and the people who live and work in them. This is what makes the FSC system unique and ensures that a forest is well-managed, from the protection of indigenous people's rights to the methods of felling trees.

What do the different labels mean ?

FSC 100% - All the timber or fibre in the product comes from an FSC-certified forest

FSC Recycled - All the timber or fibre in the product is reclaimed material

FSC Mix - The timber or fibre in the product is a mixture of some/all of the following:

- Timber or fibre from an FSC-certified forest
- Post-consumer reclaimed timber or fibre
- Timber or fibre from other controlled sources

Which products carry the label?

The FSC label is currently found on over 10,000 product lines in the UK alone. You can find it on garden furniture, decking, sheds, conservatories, tools, bird boxes and bird tables, kitchen, bathroom and general housewares, brushes, wall paper, flooring, doors, shelves, furniture, toilet tissue, paper, books, pencils - in fact most things made from wood. It can also be found on other forest products such as venison, essential oils and latex for footballs and balloons.

Where can you buy FSC labelled products?

Almost all the major DIY stores such as B&Q, Homebase and Focus DIY stock FSC items. You can also find them in High Street stores such as Marks & Spencer, Sainsbury's, John Lewis, The Body Shop, Tesco and Co-op.

Why is the FSC trademark different from other forest certification schemes?

There are a number of other forest certification around but they do not have the same strict environmental, social and economic standards or such a rigorous chain of custody; tracking timber from the forest to the final user. Therefore the FSC is the only one endorsed by the major environmental charities.

What should you do if you cannot find products with the FSC label?

Although more and more products are becoming available all the time there are still gaps in the market. If you cannot find a product you should ask for it; the greater the demand, the bigger the supply. FSC UK can also help with tracing items and there is a product search facility on the web site (www.fsc-uk.org).

10 Facts about FSC

1. You can buy wood products with a clear conscience when you see the FSC logo. FSC forests are managed with consideration for people, wildlife and the environment.
2. The FSC label guarantees that the trees that are harvested are replaced or allowed to regenerate naturally.
3. Parts of the forest are protected entirely, in order to protect rare animals and plants.
4. FSC protects the rights of indigenous people to use the forest. If they have sacred sites in the forest these are exempt from felling.
5. The forest owner must use local workers to run the forest, and provide training, safety equipment and a decent salary. The forest owner is often obliged to support the community in other ways, such as through the development of schools.
6. FSC is a market-based initiative which also ensures better conditions for the forest and the people whose livelihoods depend on it.
7. FSC gives an assurance that future generations will be able to enjoy the benefits of the forest.
8. All the wood is tracked from the forest to the store. Every link between the forest and the consumer is certified to make it clearly identifiable which wood is FSC certified and which is not.
9. FSC is the only wood certification scheme endorsed by the major environmental charities, including WWF, Greenpeace and The Woodland Trust.
10. The FSC label is not only available on wood for furniture. It can also be found on floors, decking, paper, printed matter, charcoal, kitchen utensils, latex, even venison!
