Why buy Streply®?

Falcon's exclusive Streply® range is a collection of high quality, attractive and reliable plywood products designed to appeal to a wide range of specialist end user and merchant customers.

Standard range

- [Streply® B/BB Premium Plywood](#)
- [Streply® B/BB Select Plywood](#)
- [Streply® B/BB Prime FSC® Plywood](#)
- [Streply® B/BB Premium FSC® Plywood](#)

Speciality range

- [Streply® Oversize Plywood](#)
- [Streply® Hexagon / Smooth Phenol Faced Plywood](#)

We offer four standard ranges, complemented by a number of specialist options.

All Streply® products are manufactured by the South House Woods Group, and are distributed exclusively in the UK by Falcon Panel Products. Every product is backed by a robust legal source audit process to ensure total compliance with European Union Timber Regulations (EUTR). Streply® is also fully supported by independent test evidence to fully comply with the European Construction Products Regulation (CPR).

Take a closer look at our **Standard and Speciality ranges**

Why buy Streply® ?

All our Streply® standard ranges are manufactured using an EN 314-2 Class 2 rated glue bond and have been 3rd party verified to meet the basic requirements of the Construction Products Regulation in accordance with the requirements of EN 13986:2004. We display a CE mark on the product packaging to demonstrate this. The product is tested for use in structural applications in 9mm and thicker sections as defined in EN13986:2004. Full Declaration of Performance documentation is available on request.

Standard range

Streply® B/BB Premium Plywood

Our Streply® Premium product range combines a 100% hardwood throughout core with attractive single piece temperate hardwood face veneers. Streply® B/BB is available in all major thicknesses and is particularly appreciated by joinery and specialist end-user customers who cut the product due to the high quality core construction, as well as those who like attractive and consistent single piece surface veneers. The product's reliable EN 314-2 Class 2 glue bond ensures it is suitable for almost all joinery applications.

Streply® B/BB Select Plywood

Streply® Select is a recent addition to our product range, aimed squarely at the merchant sector. Streply® Select offers the same temperate hardwood faces and glue bond as the Premium product, but with a lighter weight hardwood core.

Streply® B/BB Prime FSC® Certified Plywood

For customers requiring the additional reassurance of full Chain of Custody (COC) environmental certification in addition to mandatory EUTR compliance we are pleased to offer our 100% FSC® Streply® Prime range which is available across all major thicknesses. Manufactured using certified hardwood core timbers, with attractive temperate hardwood B/BB surface veneers, Streply® Prime is the perfect choice when full COC certification is required.

Streply® B/BB Premium FSC® Certified Plywood

For customers who want full Chain of Custody (COC) environmental certification alongside a higher density core we recommend our 100% FSC® Streply® Premium range. Manufactured using certified hardwood core sections and with attractive temperate hardwood B/BB surface veneers, Premium is the perfect choice when full COC certification combined with a higher density core is required.

Speciality range

Streply® Oversize Plywood

To complement our main range, we also offer Streply® in larger 3050x1220 and 3050x1525 sizes, across all major thicknesses. Streply® oversize plywood offers the same high quality single piece temperate hardwood face veneers as the standard size product and is manufactured using hardwood timbers in the core.

Many of our joinery customers buy both the standard and oversize Streply® products to suit their cut size machining requirements, knowing that they can rely on the high quality core construction common to both ranges.

Streply® Hexagon/Smooth Phenol Faced Plywood

All our phenol faced Streply® products are manufactured using 100% Eucalyptus cores, reflecting the demanding nature of many of the product's likely applications.

Streply® Hexagon Phenol Faced Plywood Black and Grey finish

We are pleased to offer Streply® Phenol Faced 'Hexagon' pattern one side / film reverse plywood, designed for a range of applications such as sports and playground facilities, van and trailer floors, scaffolding, loading platforms, stages and stands. Our Streply® Hexagon product is available in the following sizes: 9, 12 and 18mm 2440x1220. Black and Grey finish.

Streply® Smooth Phenol Faced Plywood Black finish

Designed for the concrete formwork market, Streply® Smooth Phenol on two sides plywood is available in the following size: 18mm 2440x1220. Black finish.
