Ogee	18mm		✓		✓
Chamfered and Rounded	18mm	✓		✓	

Also available in other sizes and profiles up to 3600mm lengths subject to minimum order quantity.

Installation guidelines

StreWrap® MR MDF mouldings can be easily installed using the same tools and fixings as you would use for any other MDF mouldings.

Nail Fix

StreWrap® can be fixed as you would any other MDF mouldings, which is generally by using lost head nails at 600mm centres, and not nearer than 15mm from any edge. Any pin holes from the nails require filling before painting.

Adhesive Fix

To save further time on site, StreWrap® can be fixed using most modern glues and panel adhesives, however, manufacturers' recommendations should be followed when used on porous damp surfaces.

We recommend that StreWrap® mouldings are kept in the environment that they are to be installed for approximately 48 hours before use.

StreWrap® must be stored under cover in a dry, well ventilated area, on a flat level surface.
